

F A D O C U M E N T

PAGE 1 OF 13

FCO DOCUMENT NO.: LN08-0001

FCO CATEGORY: O (Operational)

FA DOCUMENT NO.: FA-04990-01

APPLICABILITY: This "O" FCO should be performed on all the applicable dash variations of the LN08's and LN08R's. For example: LN08-CA and LN08R-CA, and similarly for -AD, -AE, -AG, -AI, -AS, -AT, -AZ, -CB, -CC, and -CD.

There are a total of 123 of the 110V units, and 68 of the 220V units that need the FCO. They are identified by their serial numbers given in the attached Product Correction Order (PCO) document. [The PCO is considered to be an integral part of this FA document.]

PROBLEM & SYMPTOM: The problem printers exhibit light/no printing as identified in the Field Blitz: TD # 1058, issued on/around April 1992.

SOLUTION: Determine if the customer's LN08 (DEClaser 3200 or 3250) printer is the affected printer by checking the serial number on the pop-up cover as shown on Tag 2 on pp 1-8 of the accompanying Product Correction Order (PCO), and matching it with that given in Tables 1-1/1-2 on pp 1-9. Then follow the instructions in the PCO to correct the problem.

ADDENDUM DOCUMENT: DEClaser 3200/3250 Printer Product Correction Order

PRE/COREQUISITE FCO: None

MTTI HRS: 0.67 hours, 1 person

TOOL/TEST EQUIPMENT: 1 small jeweller's file (part of FS toolkit)
