

## KZPBA-CB UltraSCSI Storage Adapter Module

*This document summarizes important information regarding the KZPBA-CB Storage Adapter Module.*

### Digital UNIX Support Notice:

**Important Notice 1: The KZPBA-CB storage adapter module is not supported in a TruCluster Configuration. If running TruCluster Software, the module should be immediately removed from the system or data integrity problems may result.**

To determine if you are running TruCluster Software, execute the following command as the user `root`:

```
# /usr/sbin/lmf list
```

A list of the products registered on your system is returned. If any of the following products are registered, then the system is configured for TruCluster Software.

Product	PAK
TruCluster Production Server Software	TCR-UA
TruCluster Available Server Software	ASE-OA
TruCluster MEMORY CHANNEL Software	MCA-UA

The Digital UNIX *Software License Management* guide and the *TruCluster Production Server Software Installation* guide provide more information about the license utility.

**Important Notice 2: DIGITAL UNIX users must install new patches in order for DIGITAL UNIX to work properly with the KZPBA-CB. Check the DIGITAL UNIX web site, <http://www.service.digital.com>, for the latest software release.**

### OpenVMS Support Notice:

**Important Notice 3: The KZPBA-CB storage adapter module is not supported in Multi-host shared SCSI bus configurations under OpenVMS at this time.**

Please refer to the KZPBA-CB User's Guide and Release Notes for more information.
