

The “Open Ocean”  
hasn't really  
been open...  
**till now**

INTRODUCING

# iridium OpenPort

The world's first and only global voice and data network for maritime shipping and fishing fleets. Simple and easy to install, **iridium OpenPort** reliably delivers always-on data and up to three separate voice lines with speeds up to 128kbps and an all IP backbone — **at a surprisingly low cost.**

available September 08, full details at: [iridium.com/openport](http://iridium.com/openport)
