

FIND YOUR WAY IN COLOR WITH

two NEW Magellan® GPS handhelds

Meridian® Color and SporTrak™ Color are the only handheld GPS devices to display maps and charts in rich, vibrant color. The bright LCD screens make maps easier to read and use for navigation. The built-in European database includes major roads, parks, nav aids, waterways, airports and more. With either, you get superior tracking under dense foliage or in urban environments. Plus, both are rugged, waterproof and float.
