Layer 3 Ethernet Switch Family

Enterprise-Class Performance with Advanced Switching Capabilities in a 1U Form Factor for 1/10-Gigabit Ethernet Networking

These Layer 3 Ethernet Switches offer 24 or 48 ports of 10/100/1000 BASE-T Gigabit Ethernet and up to four 10-Gigabit Ethernet uplinks. This allows connectivity to 10GE routers, servers, backbones, and data centers. The 1U form factor gives users the ability to optimize deployment in wiring closet or top-of-rack environments. A comprehensive routing and protocol software suite ensures optimal performance in even the most demanding enterprise-class networking environments. They are ideal for organizations with growing and consolidated data centers.
