

**Technical Bulletin****Survey/Mapping**

Date: May 6, 2004
Product: Z MAX
Subject: Z MAX with internal PDL
Number: Z MAX 2004-01

Introduction: The internal PDL in the Z-Max com module is designed to be used at a baud rate of 19,200.

Warning: Setting the baud rate to 9600 will prevent the com module from communicating with the Z Max receiver and the data collector.

Solution: If the com module will not communicate with the Z Max it will need to be sent for repair. <http://products.thalesnavigation.com/en/support/rma.asp>
