

*** NOTE ***

Pages 3 thru 82 of FCO LPS40-R001 were especially prepared using the VAX DOCUMENT generic markup system. ASCII files for these pages, are not available. Additionally, these pages contain illustrations that are critical to the FCO. Please refer to the hardcopy document (FA-04826-01) or your FCO/DEC-O-LOG microfiche titled LPS32 TO LXVXX (ES-LPS32-TI-S) in your MDS library.

DIGITAL	FCO	LEVEL OF URGENCY	PAGE 1 OF 82
		[R]	

FIELD CHANGE ORDER	NUMBER: LPS40-R001
--------------------	--------------------

APPLIC: FCO LPS40-I001 Will upgrade all field units of the LPS40 to revision level of B1. At the time of issue all field units will be at revision level of A1. See page 2 for more information.

| This revised FCO supersedes the original released 20 July 1988.
 || It has been revised to include additional corrections for three
 || hole paper jamming. Some procedures have been clarified and new
 | part numbers added.

PROB/SYMPT: The PrintServer 40 availability to customer has been severely reduced due to variety of problems affecting rate of jams and print quality. Symptoms include jamming, dirty printer, and print quality degradation.

QCK CK: The FCO is called for in all cases where the revision level of LN02, FDS, and LCIT are BELOW revision B1 as verified by barcode label.

COMPATIB/PREREQ: N/A	EST INSTALL TIME 6.0 hours
----------------------	-------------------------------

TOOLS/TEST EQUIP: See section "About This FCO" after the Table of Contents in the FCO document, for the required tools needed to complete this FCO.
