

Occasionally with a new data cartridge, medium errors may occur after only a few hours. If this occurs, perform a cleaning cycle after the first 4 to 5 hours of tape movement with the new tape. If medium errors persist, run two or more consecutive cleaning cycles. If errors still occur, the tape should be replaced.

Proper Cartridges for DIGITAL DAT drives

Use of non-DDS marked media may result in degraded drive performance and is not recommended. Digital recommends the use of Digital Equipment Corporation media.

TLZ04	60m
TLZ06 / TLZ6L	60m, 90m
TLZ07 / TLZ7L	60m, 90m, 120m
TLZ09 / TLZ9L	60m, 90m, 120m
TLZ10 / TLZ1L	60m, 90m, 120m, 125m

Orderable Part Numbers

60m (DDS-1)	TLZ04-CA
90m (DDS-1)	TLZ06-CA (5-pack-TLZ06-CB)
120m (DDS-2)	TLZ07-CA (5-pack-TLZ07-CB)
125m (DDS-3)	TLZ10-CA (10-pack-TLZ10-CB)
Cleaning Cartridge	TLZ04-HA
