10G-100G Active Optical Cables

June 8, 2020

Jerry Liu

What is an Active Optical Cable? (AOC)

Compared to Copper Cables

- ◆ **Lower weight & tighter bend radius** – Easier cable management
- ◆ **Thinner cables** – Better airflow
- ◆ **Lower power consumption** – No power-hungry conditioning ICs

Compared to Optical Transceivers

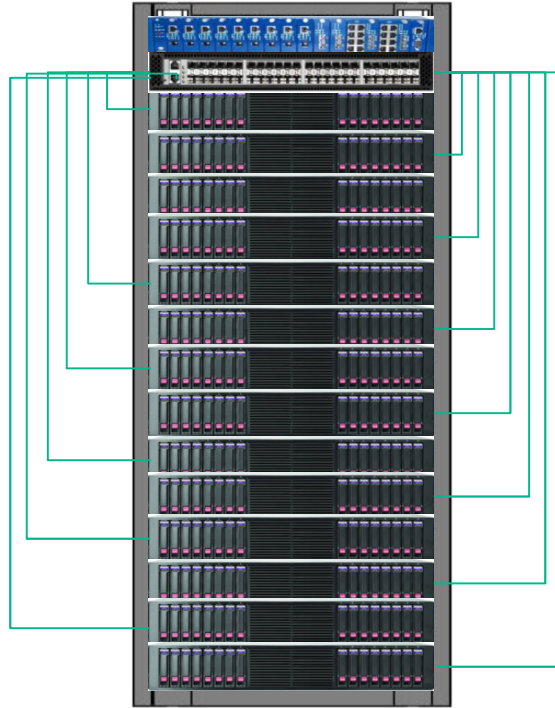

- ◆ **Cost-optimized** – Don't need to meet IEEE optical standards
- ◆ **Data Center-friendly** – No issues with dust on optics

AOC in Data Centers: Inter-rack Connections

AOC in Data Centers: Server Connections

TOR Switch / Server Racks

10G AOC

25G AOC

Benefits of AOCs vs. DACs (copper)

- Longer reach at higher data rates
- More immune to signal loss
- Immunity to Electromagnetic Interference (EMI)
- Better security (harder to tap)
- Lighter and thinner, which facilitates cable management and lowers transportation costs.
- Lower total power consumption (host + cable)

Benefits of AOC vs. Transceiver+Cabling Solutions

- Cost-optimized
- Simple solution: One SKU to buy per link
- Easy installation, “plug-and-play”
- No optical connector cleaning; no risk of dust
- Simpler link diagnostics
- No cable slack; customized lengths

II-VI AOC Products family

SFP⁺wire[®]

10G (SFP+)
25G (SFP+)

quadwire[®]

40G (QSFP,QSFP+)
56G (QSFP)
100G (QSFP28)

- II-VI-designed Technology Inside:
 - II-VI (Finisar)-designed VCSELs, LD, PD, TIA and CDR
 - II-VI (Finisar)-proprietary Connectivity Diagnostics™

Connectivity Diagnostics[®] Functionality Summary

▪ Connectivity Diagnostics[®] implements three features:

- ***LynkFind™***
 - Helps locate the other end of an AOC by lighting up both of its pull-tab LED lights.
- ***LynkGuardian™***
 - Triggers the pull-tab LED lights of both AOC ends upon Digital Diagnostic Monitoring warning or alarm events, or upon a transmitter fault or a receiver loss of signal.
- ***LynkCommander™***
 - Allows a host to control the pull-tab LEDs of both AOC ends by writing a command byte to the near-end transceiver.

▪ Connectivity Diagnostics[®] availability:

- **10G/25G SFPwire[®]** and **40G/56G Quadwire[®]** AOCs

▪ Technical Support:

- Please check with II-VI which features are implemented in the AOCs of interest
- Refer to II-VI's Application Note AN-2158 for technical details.
- Check out our demo video at <https://www.youtube.com/watch?v=Ji7NiGvgCao>

SFPwire® 10G AOC

FCBG110SD1Cxx (without CD)
FCBG110SD1Cxx-1V (with CD)

PRODUCT BASICS

- Hot-pluggable SFP+ cable ends
- Supports 10.3125Gb/s bit rate
- RoHS-6 compliant
- SFI Limiting interface
- Single 3.3V power supply
- Low power dissipation
- 0°C to 70°C
- Rigid pull-tab for improved high-density installations

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production

SFPwire® 25G AOC

FCBG125SD1Cxx (without CD)
FCCG125SD1Cxx (with CD)

PRODUCT BASICS

- Hot-pluggable SFP+ cable ends
- Supports 25.7813Gb/s bit rate
- SFI limiting interface
- Input equalization and output emphasis controls
- Single 3.3V power supply
- Low power dissipation
- 0°C to 70°C
- Rigid pull-tab
- RoHS compliant

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production

Quadwire® 40G AOC

quadwire®

FCBx410QD3Cyy (without CD)
FCCx410QD3Cyy (with CD)

PRODUCT BASICS

- Four-channel full-duplex active optical cable
- Multi-rate capability: 1.06Gb/s to 10.5Gb/s per channel
- Complies with QSFP MSA high density form factor
- Reliable VCSEL array technology using multimode fiber
- Round, plenum-rated (OFNP) and riser-rated (OFNR), low smoke zero halogen (LSZH) cables
- Hot Pluggable
- Low power dissipation: <1.3W per cable end
- 0°C to 70°C
- RoHS-6 Compliant

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production

Quadwire® 56G AOC

FCBx414QD3Cyy (without CD)

FCCx414QD3Cyy (with CD)

PRODUCT BASICS

- Four-channel full-duplex active optical cable
- Multi-rate capability: 1.06Gb/s to 14.0625Gb/s per channel
- Complies with QSFP MSA high-density form factor
- Reliable VCSEL array technology using multimode fiber
- Round, plenum-rated (OFNP) and riser-rated (OFNR), low smoke zero halogen (LSZH) cables
- Hot Pluggable
- Low power dissipation: <1.3W per cable end
- 0°C to 70°C
- RoHS-6 Compliant

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production

Quadwire® 100G AOC

FCBx425QE2Cxx (Ethernet)
FCBx425QB2Cxx (InfiniBand)
FCBx425QM2Cxx (Multirate)

PRODUCT BASICS

- 4 lanes x 25.78125 Gbit/s
 - Multirate supports 28Gb/s per lane
- Based on QSFP28 MSA form factor
- <2.5W maximum power dissipation per end
- InfiniBand, Ethernet, and Multirate versions
- Supporting up to 100m cable lengths
- 0 to 70C operating case temperature
- Uses II-VI 25G VCSEL and PIN arrays
- Round, plenum-rated (OFNP) and riser-rated (OFNR), low smoke zero halogen (LSZH) cables

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production

Quadwire® 100G Octopus AOC

FCBx525QE1Cxx

PRODUCT BASICS

- Four-channel full-duplex active optical cable with breakout from QSFP28 to four SFP28
- Complies with QSFP28 and SFP28 MSA form factors
- Round, plenum-rated cable
- Reliable VCSEL array technology using multimode fiber
- Low power dissipation: <2.5W on QSFP28 end, <1W on SFP28 end
- 0°C to 70°C
- RoHS-6 Compliant

COMPETITIVE ADVANTAGES

- The worldwide leading supplier of optical communication products
- The only one with the best vertical integration capability
- II-VI-designed and owned technology inside
- II-VI-designed and owned global manufacture and QA process

AVAILABILITY

- Mass Production
