The new CF-74 incorporates the latest Intel® Centrino® Duo Processor Technology, which offers enhanced WLAN communication and improved power efficient performance. With a new high-capacity Lithion-Ion battery the operation time has increased making the CF-74 capable of working for up to 8 hours without recharging.

Constructed using tough, scratch resistant magnesium alloy casing, the CF-74 has a vibration dampened LCD panel and the HDD can withstand a drop from up to 90cm protecting your data from being lost. The splash resistant keyboard and touchpad helps to stop water or any other liquid from entering the casing and causing internal damage, while rubber port covers protect all sensitive external connections.

The versatile DVD Multi Drive and large outdoor-readable LCD let you work seamlessly in any location and make it perfect for delivering high-impact multimedia presentations. In addition, the built-in stereo speakers provide presentation quality sound over a wide frequency range. The Mini Port Replicator, available separately, offers a convenient connection for peripheral equipment.
